Technical Support Document # 1

**COMPARATIVE EVALUATION OF
ALTERNATIVE SITES
CAPITAL REGION RESOURCE RECOVERY
CENTRE**

Table of Contents

INTRODUCTION..... 1

APPENDICES

APPENDIX TSD#1-A

Atmospheric Component

APPENDIX TSD#1-B

Geology, Hydrogeology & Geotechnical Component

APPENDIX TSD#1-C

Surface Water Component

APPENDIX TSD#1-D

Biology Component

APPENDIX TSD#1-E

Land Use & Socio-Economic Component

APPENDIX TSD#1-F

Cultural & Heritage Resources Component

APPENDIX TSD#1-G

Agriculture Component

APPENDIX TSD#1-H

Design & Operations Component

APPENDIX TSD#1-I

Traffic Component

INTRODUCTION

This supporting document provides the background information and rationale used for all environmental components to complete a comparison of the two Alternative Sites proposed for the CRRRC project. The information used in this comparison was that available from published information and from preliminary investigations/assessments on or in the vicinity of each of the Alternative Sites. Each of the following **Appendices TSD#1-A through TSD#1-I** provides the information and rationale used in the comparative assessment for each component, and identifies the Site that is preferred for that component. The comparison was undertaken in accordance with the Ministerial approved Terms of Reference for the Environmental Assessment of the proposed CRRRC. This comparison is summarized and the overall preferred Site for the CRRRC project is identified in the EASR.
